

GUNNAM SAI SAKETH RAM

Computer Science Undergraduate

saisakethram.g@gmail.com | +91 7338421036 | Bengaluru, India | [linkedin.com/in/contactsaketh](https://www.linkedin.com/in/contactsaketh) | github.com/Sak3th2004

PROFILE SUMMARY

Final-year Computer Science student (B.Tech, GITAM University, 2026) and **Grand Champion of the ET GenAI Hackathon 2026** — winner of the national 1st prize among 50,000+ participants. Builder of production-grade AI, full-stack, and event-driven systems using Python, Java, and modern AI frameworks (PyTorch, LangGraph, RAG). IEEE-published author and Oracle Cloud Infrastructure certified. Strong record of leading teams, shipping working prototypes, and translating research into impact.

EDUCATION

B.Tech in Computer Science and Engineering
GITAM University, Bengaluru

09/2022 – 07/2026
Bengaluru, India

INTERNSHIP EXPERIENCE

Intel® Unnati Industrial Training Internship
Intel®

05/2025 – 07/2025
Bengaluru, India

- Led a team of 3 to build an AI Image Super-Resolution pipeline using PyTorch and TensorFlow on the DIV2K dataset, applying knowledge distillation from a teacher CNN to a 483K-parameter student model.
- Achieved **92.7% SSIM and 28.5 dB PSNR** with real-time 1920×1080 inference, balancing accuracy against latency and parameter count.
- Owned the full delivery cycle — preprocessing, training, benchmarking, and stakeholder demos — in Agile sprints with Intel mentors.
- Maintained reproducible experiments and full GitHub documentation for fast iteration on architecture and loss-function changes.

PROJECTS

AgriBloom Agentic — AI Advisory for Indian Farmers [\[GitHub\]](#) — ET GenAI Hackathon 2026 Winning Project

Python, PyTorch, EfficientNet-B4, LangGraph, Gemini Vision API, ChromaDB (RAG), Gradio

- Built a 5-agent LangGraph pipeline (Orchestrator → Vision → Knowledge → Compliance → Output) that takes a crop photo and returns disease diagnosis with treatment in 10 Indian languages.
- Trained an EfficientNet-B4 classifier on 91,000+ images across 92 disease classes; added a Gemini Vision fallback for any crop outside the trained set.
- Implemented a deterministic compliance engine that blocks 46 CIB&RC-banned pesticides and enforces FSSAI MRL limits, with a full audit trail per check.
- Integrated an ICAR-grounded RAG knowledge base in ChromaDB for advisory retrieval, plus a fertilizer NPK calculator, KVK helpline finder, and voice/PDF report output.

ZKProofAPI — Zero-Knowledge Proof Authentication Platform [\[GitHub\]](#)

Python, FastAPI, PostgreSQL, Redis, Celery, React, Docker, secp256k1 Schnorr Proofs

- Built a production-grade SaaS platform providing ZKP authentication via REST API — Schnorr proofs on secp256k1 with sub-5ms verification, no blockchain required.
- Developed full-stack infrastructure: FastAPI backend with 8 SQLAlchemy models, React developer dashboard (11 pages), Celery for async batch processing, and JavaScript + Python SDKs for 3-line client integration.
- Shipped with 37 passing tests, Alembic migrations, Docker Compose deployment (API + PostgreSQL + Redis + Celery), and CI/CD via GitHub Actions — basis for the IEEE conference publication.

AI-Enhanced Cloud Resource Optimizer [\[GitHub\]](#)

Java, Spring Boot, React, MongoDB, Docker, Pinecone

- Engineered a hybrid forecasting engine (EMA + Linear Regression + LSTM-inspired) processing 10,000+ metrics, delivering 40% simulated cost reduction via intelligent auto-scaling.
- Implemented Pinecone vector search with 8-dimensional workload embeddings and cosine similarity for workload pattern classification.
- Shipped a full-stack platform with 10 RESTful APIs, real-time dashboard, and one-command Docker deployment.

ACHIEVEMENTS

- Grand Champion (1st Prize) — ET GenAI Hackathon 2026**, organised by *The Economic Times* in partnership with *Unstop* (Dec 2025 – Apr 2026). Won the national 1st prize of **INR 5,00,000** among 50,000+ participants for **AgriBloom Agentic**. [\[ET feature\]](#) [\[ET LinkedIn post\]](#)
- IEEE Conference Publication (1st Author)** — "Secure Authentication and File Integrity Verification Using Zero Knowledge Proof Cryptographic System," ICACKE 2026 (Feb 2026). [\[Submission\]](#)
- 2nd Prize — IEEE Poster Presentation on Explainable AI (XAI)**; presented model interpretability techniques for transparent and trustworthy AI systems. [\[LinkedIn post\]](#)

SKILLS

Languages: Python, Java, SQL

AI / ML: PyTorch, TensorFlow, Scikit-learn, EfficientNet, Knowledge Distillation, RAG, LangGraph, Gemini Vision API, Vector Embeddings (Pinecone, ChromaDB)

Backend & Web: Spring Boot, FastAPI, REST APIs, React, Gradio, Streamlit

DevOps & Tools: Docker, Docker Compose, Git, GitHub, Maven, Linux CLI, Agile / Scrum

Databases: MongoDB, MySQL, Pinecone, ChromaDB

CERTIFICATIONS

- Oracle Cloud Infrastructure Foundations Associate** — Oracle
- Intel® Unnati Industrial Training Program** — Intel, 2025
- GitHub Foundations Certificate** — GitHub
- Neo4j Certified Professional** — Neo4j
